PROFILE

I am a student who is passionate about developing innovative user interfaces and conducting testing to improve software quality. As a prospective vocational school graduate majoring in Software Engineering (RPL), I have a strong foundation in HTML, CSS, and JavaScript. Additionally, additional expertise in Tailwind CSS and Vue.js enriched my technical skills.

In my 6 month internship experience at the Language Center, Pare, Kediri Regency, East Java, I have successfully implemented a responsive and dynamic user interface. I actively use Tailwind CSS to speed up development and Vue.js to improve responsiveness. I also have experience in functional testing and user interface quality improvement.

With a high enthusiasm for learning, I am always ready to face new challenges in the world of software development. I hope to bring positive contributions in future projects and continue to hone my skills to achieve success in a career as a Front-End Developer & Tester.
